PROFESSIONAL EXPERIENCE

Linedata Tunisia | LGH Team

Nov 2025 - Present

Software Engineer (React • .NET • Oracle SQL)

- Built portfolio management features in React and ASP.NET Core that helped close three new enterprise clients
- Designed Oracle SQL data providers and GraphQL APIs handling high-volume trading data for enterprise clients
- Redesigned core trading interface screens for clarity and speed based on direct user and PM feedback
- Contributed to the LGH release named Best Portfolio Management Software at the S&P Global (APAC 2026)

King Solar Agency

Aug 2024 - Jun 2025

Fondateur & Développeur Web Full-Stack

- Founded and scaled a web design & development agency serving the U.S. solar market
- Delivered high-converting lead-gen websites with an average conversion rate above 18%
- Managed end-to-end development, SEO, and hosting for every client engagement, maintaining 100% client satisfaction

SWD Agency

Sep 2023 - May 2024

Web Developer & Designer

- Developed and maintained 6+ client platforms, including e-commerce and travel booking systems.
- Optimized performance, reducing load times by 30%, resolving 100+ production issues, and improving satisfaction by 25%

KEY PROJECTS

DockKnock — 1st Place MutualHack by MAE 2026

React Native • Supabase

- Led the project end-to-end, from business model and product planning to technical delivery and final pitch.
- Built a home healthcare platform connecting patients with nearby healthcare professionals
- Won 1st place out of 24 finalist teams selected from 2,200+ participants and joined the MAZAM incubation program

DocAI — Intelligent Patient Management Platform

React.js • Spring Boot • IBM FileNet • PostgreSQL • Gemini API

- Built an AI-based healthcare platform for patient triage, appointment management, and document handling
- Integrated IBM FileNet for secure document management and implemented role-based access control
